

4. A system (10) according to claim 1 in which transfer of electronic data between the at least one data server (18, 20) and the supplying terminal (12) is carried out securely.
5. A system (10) according to claim 1 in which transfer of electronic data between the supplying terminal (12) and the mobile terminal (14) is carried out securely.
6. A system (10) according to claim 1 in which the supplying terminal (12) is a vending machine which supplies electronic data in exchange for a monetary payment.
8. A system (10) according to claim 1 in which the mobile terminal (14) and the supplying terminal (12) communicate by the Wireless Application Protocol (WAP).
9. A system (10) according to claim 1 in which the wireless network (24) and the wireless connection operate using different carrier frequencies.
11. A system (10) according to claim 1 in which the wireless network (24) is provided by a cellular network.
12. A system (10) according to claim 1 in which the wireless connection is a connection between the mobile station and the supplying terminal in a pico-cell.
13. A system (10) according to claim 1 in which the wireless connection is a Low Power Radio Frequency (LPRF) connection.
14. A system (10) according to claim 1 in which wireless network (24) obtains the data from a second network which is a wired network.
15. A system (10) according to claim 1 in which the wireless network (24) obtains the data from the Internet via a gateway.
16. A system (10) according to claim 1 in which the data transmitted to the mobile

terminal (14) from the supplying terminal (12) is only part of the data transmitted to the supplying terminal by the or each data server (18, 20).

18. A system (10) according to claim 1 in which the electronic data obtained from at least one data server (18, 20) is determined by a person controlling operation of the supplying terminal (12).

20. A system (10) according to claim 1 in which the price at which the electronic data is sold is determined by a person controlling supply of that electronic data to mobile terminals (14).

21. A system (10) according to claim 1 in which the mobile terminal (14) is a mobile telephone.

22. A system (10) according to claim 1 in which the mobile terminal (14) is selected from a group consisting of game playing devices, portable audio players, portable video players personal digital assistants and smart telephones.

23. A system (10) according to claim 1 in which the data in electronic form is uploaded to the supplying terminal in an operation that is independent from a request being made for the data in electronic form by the mobile terminal.
